

Acer palmatum ' Orange Dream '

Origin : Japan.

CHARACTERISTICS : In the springtime, the foliage is yellowy-orange becoming light green in Summer. In Autumn, turns back to its Spring colour

Hardiness : -25°C

Light : Shade and Partial shade

Size : 2 to 4 m.

Growth habit : Upright

Propagation : Grafting

Needs : To be planted imperatively in the shade, this particularly applies for the South of France. In the North, can be placed in the sun if regularly watered in Summer. Protect from wind.

Uses : In ground: isolated specimen, suitable for pots.

Maintenance : This variety has a tendency to develop big branches. To keep the symmetry, pruning in February is recommended.
